

REPLACEMENT PARAGRAPH BRIDGING PAGES 5 AND 6

In an expedient embodiment, the pivot support 15 is provided with a return element, not illustrated in detail and only schematically shown by arrow SP in Fig. 5, for example, a spring that retracts upon closing of the top compartment lid 8 and returns the pivot support 15 from the illustrated contact phase (Fig. 5) into the initial position (Fig. 3) relative to the top compartment lid 8;.
